SUMMARY

Senior software engineer with 7 years of experience building and scaling backend services for logistics and fintech products. Leads design of event-driven systems in Python and Go on AWS, mentors engineers, and turns reliability problems into measurable wins.

EXPERIENCE

Cedarline Logistics

Chicago, IL

Senior Software Engineer

Mar 2022 – Present

- Designed an event-driven shipment tracking service in Go and AWS SQS that processes 4M events per day, cutting status-update latency from 15 minutes to under 30 seconds.
- Led migration of 12 legacy cron jobs to AWS Step Functions, reducing failed nightly runs by 85% and on-call pages by 40%.
- Introduced contract testing across 6 teams, catching 30+ breaking API changes before release in the first two quarters.
- Mentored 4 engineers through promotion cycles and ran a weekly design review adopted as a team standard.

Brightforge Software

Remote

Software Engineer II

Jun 2019 – Feb 2022

- Built payment reconciliation APIs in Python (FastAPI) and PostgreSQL handling \$250M in annual transaction volume.
- Optimized slow reporting queries with indexing and caching, reducing p95 response time from 4.2 seconds to 600 milliseconds.
- Automated CI/CD with GitHub Actions and Terraform, shortening release time from 2 days to 3 hours.
- Partnered with finance and product teams to define reconciliation rules, clearing a backlog of 1,200 mismatched transactions.

Harbor & Pine Insurance

Milwaukee, WI

Software Engineer

Jul 2017 – May 2019

- Developed internal claims tools in Java and Spring Boot used by 300+ adjusters, reducing manual data entry by 25%.
- Wrote unit and integration tests that raised coverage on the claims service from 38% to 81%.
