EXPERIENCE

Pinecrest Health Systems

Austin, TX

Software Engineering Intern

May 2025 – Aug 2025

- Built a Python script that validated 50,000 patient-scheduling records nightly, flagging duplicates and cutting manual review time by 30%.
- Added REST endpoints to an internal Flask service and wrote pytest suites that raised test coverage from 55% to 78%.
- Presented a demo of the validation tool to 20 engineers and product managers at the intern showcase.

Northfield State University, Department of Computer Science

Austin, TX

Undergraduate Teaching Assistant, Data Structures

Jan 2025 – May 2026

- Led weekly lab sessions for 35 students and held office hours on recursion, trees, and graph algorithms.
- Wrote 12 autograder test cases that reduced grading turnaround from one week to two days.

PROJECTS

Campus Transit Tracker

Jan 2026 – Apr 2026

- Built a React and Node.js web app that shows live bus arrival estimates from a public transit feed, used by 400+ students.
- Stored route data in PostgreSQL and deployed with Docker, keeping page load time under 1 second.

Course Recommendation Model

Aug 2025 – Dec 2025

- Trained a scikit-learn model on 8,000 anonymized course records to suggest electives, reaching 82% top-3 accuracy.
- Compared 3 models with 5-fold cross-validation and documented trade-offs in a 6-page report for the course capstone.
