

Tailor your resume. Never fake a skill.

A free Claude skill that tailors your resume honestly and turns every skill gap into a lesson. Here is how, in 5 steps.

STEP 1 Feed it your story

● ● ● Your GapToGrowth folder

Sample Resume/

├─ My Resumes/

│ └─ JordanEllis_Resume_2023-05-14_Old.pdf

│ └─ JordanEllis_Resume_2025-02-02_Analyst.pdf

│ └─ Reference_Graduate_OnePage.md

My Resumes facts + your voice

Reference layout ideas only

YOU TYPE IN CLAUDE

Use the GapToGrowth skill. Set up my resume agent in this folder and run Phase 0 (Onboarding).

Runs in Claude Cowork | Recommended model: Sonnet 5

STEP 2 It learns you

Phase 1 reads every old resume, builds your career knowledge base, and asks before it trusts anything.

● ● ● Claude | Phase 1: one batch of questions
I read your 3 resumes. Before I lock in your facts:

- 1 TITLE CONFLICT**
Your 2025 resume says "Data Analyst"; your Current resume says "Senior Data Analyst". Current wins unless you correct it.
- 2 DROPPED CLAIM**
"Cut weekly report time by 40%" appears only in your 2023 resume. Still true? Keep it on file?
- 3 UNPROVEN SKILL**
Tableau is in your Skills list, but no bullet shows how you used it. At work, in a lab, or not at all?

YOU: 1. Senior is right. 2. Yes, keep it. 3. Course lab only.

WRITING STYLE DNA

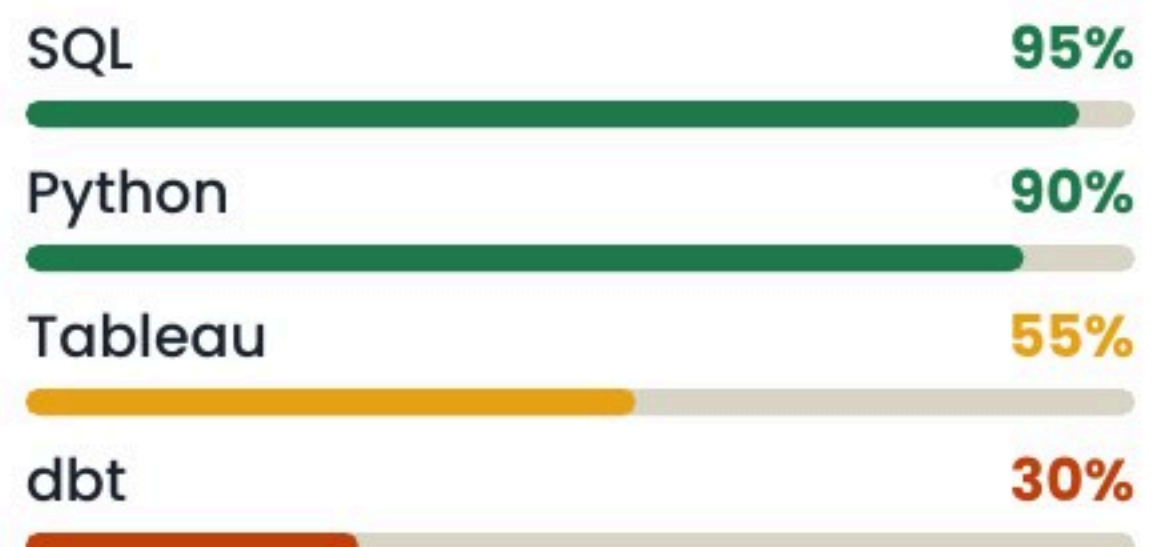

Pattern:

Action > What > Tools > Result

Your verbs:

built, automated, reduced

Avoid: "responsible for"

EVIDENCE BANK

STEP 3 Paste a JD. Get the truth.

Every keyword gets an evidence score and a category. Nothing goes on your resume until you approve it.

YOU TYPE IN CLAUDE

New JD: Senior Data Analyst at Harborline Health
[full job description pasted here]

● ● ● Claude | Keyword review

KEYWORD	EVIDENCE	CATEGORY
SQL	95%	AUTO-ADDED
Python	90%	AUTO-ADDED
A/B testing	80%	A Add + learn
Tableau	55%	B Learn only
dbt	30%	B Learn only
Snowflake	?	C Verify with me

VERIFY WITH ME

Have you used Snowflake at work, in a lab, or not at all?

YOU: Approve all. Snowflake: never used it, so learn only.

STEP 4 Word first. PDF on your OK.

A one-page resume in your own voice. You review the Word file before any PDF exists.

JORDAN ELLIS

Senior Data Analyst | SQL | Python | Experimentation

SUMMARY

- [Redacted]
- [Redacted]

EXPERIENCE**Senior Data Analyst, Lakeview Retail Group**

Designed A/B tests for 4 checkout flows in SQL and Python, lifting conversion by 6%

CLAUDE ASKS

Please review the Word version. Are the changes good, and should I generate the PDF?

YOU

Looks good, generate the PDF.

No approval, no PDF.

Ask for changes and it edits the Word file first, then asks again.

● ● ● Saved to your folder
